

Madrid, October the 30th. 2020.

To Whom It May Concern,

It is a great pleasure to recommend Guillermo for the Vucanus Scholarship program.

I have been the teacher of Guillermo for his last year of studies 2019/2020 at the Universidad Autónoma de Madrid, one of the best public universities of Madrid and Spain.

From the time I first met Guillermo I realized he is one of these students that has his goals clear, keeps dreaming and he is mature and strong minded enough to face in a realistic way any unexpected circumstance that could happen.

While our course advanced, these initial impressions were confirmed. I could check, in addition, he is quite active, open to talk with everybody, respecting their opinions although they could differ from his and getting the best option in any situation.

One of the factors that could explain Guillermo's great evolution is that he was at work (TECNATOM S.A. company) while he was attending his academic issues. It is not the first time I see how students improve their capabilities when they have to make the effort to study and work at the same time.

Guillermo grew tremendously during the time we shared my course. Sometime after having finished it, Guillermo told me he had a nice, successful and enrichment experience as a foreigner student in the Erasmus program expending one academic course in Bergen University. This institution is one of the most relevant both in Norway and in Europe.

My impression is that Guillermo's limit is the sky. He is the kind of student whose career I like to track. It would be nice to have the opportunity of collaborating with him and with any research or academic institution to which he belongs in future.

Best regards,

Please feel free to contact me if you have any questions at
